Dummy Mathematical Problem – Page 1

Problem Statement

This is a sample five-page PDF created for testing the Haryana Info Hub document viewer and download functionality.

Question

A school has 240 students. The number of students increases by 15% in the next academic year. Calculate the new number of students.

Given

Original students = 240
Increase = 15%

Solution

Increase = $240 \times 15 / 100 = 36$ students.
New total = $240 + 36 =$ **276 students**.

Dummy Mathematical Problem – Page 2

Algebra Problem

Solve the quadratic equation: $x^2 - 7x + 12 = 0$.

Method

We need two numbers whose product is 12 and whose sum is 7.

Factorisation

$x^2 - 7x + 12 = (x - 3)(x - 4)$.

Answer

Therefore, $x - 3 = 0$ or $x - 4 = 0$.
$x = 3$ or $x = 4$.

Dummy Chemistry Problem – Page 3

Question

Calculate the molecular mass of water (H■O). Use H = 1 and O = 16.

Formula

Molecular mass of H■O = 2 × atomic mass of H + atomic mass of O.

Calculation

H■O = (2 × 1) + 16 = 18.

Answer

The molecular mass of water is **18 atomic mass units (u)**.

Dummy Chemistry Problem – Page 4

Balancing Chemical Equation

Balance the following reaction:
H■ + O■ → H■O

Step 1

There are two oxygen atoms on the left but only one on the right. Put coefficient 2 before H■O.

Step 2

The equation becomes: H■ + O■ → 2H■O.

Step 3

There are now four hydrogen atoms on the right, so put coefficient 2 before H■.

Final Balanced Equation

2H■ + O■ → 2H■O
